Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/644,450

Applicant(s)

SCHMIDT ET AL.

Examiner

John m. Cooney

Art Unit

1711

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 August 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3,4,6,8-11,13,14,16-19,21-29,31,34,36-42 and 44 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,3,4,6,8-11,13,14,16-19,21-29,31,34,36-42 and 44 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 20 August 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Applicant's arguments filed 8-16-06 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-4,6,8-11,13,14,16-19, 21-29, 31, 34, 36-42, and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spitzer et al. (5,340,900).

Spitzer et al. disclose preparations of polyurethane products prepared from hardener composition constituent a) meeting the first polyols of applicants' claims, Lupranol 2042 meeting the second polyol of applicants' claims, Jeffamines, including Jeffamine D2000, meeting the curing component of applicants' claims, and blowing agents including water (see column 3 lines 18-58, column 6 lines 32-39, column 10 lines 38-42, and example 6, as well as, the entire document).

Spitzer et al. differs from applicants' claims in that the ranges of amount values for the hardening composition constituent a) of Spitzer et al. do not correspond exactly to those for the first polyol of applicants' claims. However, Spitzer et al.'s disclosure (see again column 3 lines 18-58) does indicate overlap with the ranges of values of applicants' claims. Accordingly, it would have been obvious for one having ordinary skill

Art Unit: 1711

in the art to have varied the amount of the hardening composition constituent a) within the teachings of Spitzer et al. for the purpose of controlling its hardening effect in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Spitzer et al. differs from applicants' claims in that densities as claimed are not exemplified. However, Spitzer et al.'s own teaching (see again column 6 lines 32-39) identifies employment of blowing agent, particularly water, and control of its employment for control of its effect. Accordingly, it would have been obvious for one having ordinary skill in the art to have controlled the amount of water blowing agent within the teachings of Spitzer et al. for the purpose of controlling the pore forming and, accordingly, densification effects in the products realized in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Applicants' arguments have been considered, but rejection is maintained as set forth above.

Rejection as to blowing agent amounts is maintained because reference teaches inclusion of additives such as blowing amounts, in particular water, in amounts of up to 30% by weight. Reduced density of articles realized is not seen to be an unexpected result attributable to employment of blowing agent in the amounts as claimed.

When considering showings of new or unexpected results, the following need to be considered:

Art Unit: 1711

Results Must be Unexpected:

Unexpected properties must be more significant than expected properties to rebut a prima facie case of obviousness. *In re Nolan* 193 USPQ 641 CCPA 1977.

Obviousness does not require absolute predictability. *In re Miegel* 159 USPQ 716.

Since unexpected results are by definition unpredictable, evidence presented in comparative showings must be clear and convincing. *In re Lohr* 137 USPQ 548.

In determining patentability, the weight of the actual evidence of unobviousness presented must be balanced against the weight of obviousness of record. *In re Chupp*, 2 USPQ 2d 1437; *In re Murch* 175 USPQ 89; *In re Beattie*, 24 USPQ 2d 1040.

Claims Must be Commensurate With Showings:

Evidence of superiority must pertain to the full extent of the subject matter being claimed. *In re Ackerman*, 170 USPQ 340; *In re Chupp*, 2 USPQ 2d 1437; *In re Murch* 175 USPQ 89; *Ex Parte A*, 17 USPQ 2d 1719; accordingly, it has been held that to overcome a reasonable case of prima facie obviousness a given claim must be commensurate in scope with any showing of unexpected results. *In re Greenfield*, 197 USPQ 227. Further, a limited showing of criticality is insufficient to support a broadly claimed range. *In re Lemin*, 161 USPQ 288. See also *In re Kulling*, 14 USPQ 2d 1056.

Applicants' have not persuasively demonstrated unexpected results for the employment of blowing agents in the amounts of their claims in the compositions as

Art Unit: 1711

claimed. Applicants have not demonstrated their results to be clearly and convincingly unexpected and more than mere optimizations of the knowledge in the art or more significant than being secondary in nature. Applicants' have not demonstrated their showing to be commensurate in scope with the scope of combinations now claimed.

Applicants' have not demonstrated patentability of their formulated resin component claims based on the spraying applications of their disclosure. Polyurethane products have not been demonstrated to be different based on means of their formation as claimed. Further, the methods are not differentiated by the means of providing as set forth in the claims. That claim 41 additionally requires spraying the components exemplifies the fact that applicants' broadest claims do not require spraying. Additionally, applicants do not set forth specifics of their spraying operations which differentiate over the processing operations disclosed by Spitzer et al. (see again column 9 lines 5-20).

Applicants' arguments as to the NCO index values of their claims have been considered. However, distinction based on the ranges of values claimed over the customary reactive ratios (see again column 7 lines 55-63) disclosed by Spitzer et al. Further, it has long been held that a prima facie case of obviousness has been held to exist where the proportions of a reference are close enough to those of the claims to lead to an expectation of similar properties. *Titanium Metals v Banner* 227 USPQ 773. (see also MPEP 2144.05 I).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stone et al. (5,006,569) is retained as art of interest for its teachings of the relationship between carbon dioxide generating water blowing agent usage and foam density.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Cooney whose telephone number is 571-272-1070. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
